

Verizon
600 Hidden Ridge
Irving, TX 75015-2092

SHORT TERM PUBLIC NOTICE OF NETWORK CHANGE UNDER RULE 51.333(a)

May 4, 2015

Carrier: Verizon New York Inc., 140 West Street, New York, NY 10007

Contact: For additional information on these planned network changes, please contact:

Harvey Salzberg
Global Engineering and System Performance
Verizon Wireline Network Operations
140 West Street, 5th Floor
New York, NY USA 10007
212-519-4852

Scott Walker
Manager – Global Engineering and System Performance
Verizon Wireline Network Operations
13100 Columbia Pike, 02 Floor Room A24
Silver Spring, MD USA 20904
301-282-5514

Implementation Date: On or after **September 19, 2015**

Planned Network Change(s) Will Occur at the Following Location(s):

Location	Verizon Central Office (or Other) CLLI Code
104 Broad Street, New York, NY 10004 (Broad Street 5ESS switch)	NYCMNYBDS1
375 Pearl Street, New York, NY 10038 (Pearl Street CS2K switch)	NYCMNYPSP0

Description of the Planned Network Change(s):

The Verizon Broad Street 5ESS switch (NYCMNYBDS1), located at 104 Broad Street, New York, NY 10004, will be decommissioned and replaced by the Verizon Pearl Street CS2K switch (NYCMNYPSP0), located at 375 Pearl Street, New York, NY 10038. After all traffic served by the Broad Street 5ESS switch (NYCMNYBDS1) is migrated to the Pearl Street CS2K switch (NYCMNYPSP0), the Broad Street 5ESS switch (NYCMNYBDS1) will be decommissioned (retired). Network trunks will be interconnected through the Pearl Street CS2K switch (NYCMNYPSP0). Once these changes are completed, the Pearl Street CS2K switch (NYCMNYPSP0) will be home to all 12 (twelve) NPA NXX codes that are currently native to the Broad Street 5ESS switch (NYCMNYBDS1), which will be reflected in the LERG. Traffic to be migrated to the Pearl Street CS2K switch (NYCMNYPSP0) includes, but is not limited to, Inter-LATA access traffic (including Feature Group B and D traffic), Intra-LATA traffic, and local traffic.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

All ASRs for the Pearl Street CS2K switch (NYCMNYPSP0) for trunk interconnection must include the project code of **NYCMNYBDS1**. All carriers (e.g., CLEC, Wireless or IEC) should submit direct end office trunk (DEOT) orders no later than **August 3, 2015**. These DEOT interconnections will support traffic migration for the Broad Street 5ESS switch (NYCMNYBDS1), prior to its eventual decommissioning. Prior to decommissioning of the Broad Street 5ESS switch (NYCMNYBDS1) (on or **after September 19, 2015**), LERG change effective dates will be posted. This will serve to guide interconnect re-routes of traffic for the 12 (twelve) native codes currently served by the Broad Street 5ESS switch (NYCMNYBDS1) to reflect the Pearl Street CS2K switch (NYCMNYPSP0) as the new home switch.
