Implementation Date: June 30, 2010 (or later)

Planned Network Change(s) Will Occur at the Following Location(s): See Table A below.

Description of the Planned Network Changes: Verizon is rearranging its existing SS7 network to create a network in West Virginia that is distinct and separate from networks operated by its affiliates. Table A below lists the SS7 point codes that will be changed in West Virginia along with applicable CLLI codes and impacted West Virginia exchanges. The point codes in these West Virginia exchanges will change from Network ID 246 point codes to Network ID 202 point codes.

Description of Reasonably Foreseeable Impact of the Planned Changes: All service providers with SS7 signaling to Verizon in the impacted areas will be required to coordinate a date with Verizon to convert their SS7 signaling from the existing network ID 246 point codes to the new Network ID 202 point codes.
