GSA Comment Regarding Service Enabling Devices

The GSA schedule contractor has modified the contract to include zero dollar (no-cost) service enabling devices (including, but not limited to cellular phones), bundling the devices with service. The service enabling devices are offered on an as-available basis and may or may not be domestic end product or end product of a designated country. The devices are not available through this contract apart from ordering cellular service.

Cellular service is one of several services excluded from the World Trade Organization Government Procurement Agreement and the other Free Trade Agreement executed by the United States Government. See FAR 25.401 (b). The wireless service offered under this contract has been determined by the GSA Schedule Contracting Officer to be domestic in origin. See FAR 25.402 (a)(2).

As cellular service is excluded from TAA coverage, GSA has used the group offer analysis provided by FAR 25.503 (c)(1) to determine that the value of the domestic end product exceeds 50 percent of the total proposed price of the group; therefore, the bundled cellular service and service enabling device group offer is evaluated as domestic.

The Government's Price Evaluation will use previously-identified estimated volumes from Section 4.9 (Estimated BPA Volumes). For purposes of determining the Government Volume based discounts (see Table 3-11), the Bid Model assumes that these volumes will be split evenly among three awardees. NOTE: Three awardees is an assumption only for the purposes of assessing the impact of volume discounts and does not imply any expected or pre-determined number of actual awardees. For all pricing, including as available items, the Government may compare the submitted pricing to commercially available pricing and against each other.

(1) Long distance Calling is assumed to be 60% wireless terminated and 40% wireline terminated.

Table 4-4: Estimated International Usage by Country
(for Bid Model *)

	% of Total
Description	Usage
Canada	24.0%
China	6.0%
France	6.0%
Germany	6.0%
Israel	5.0%
Japan	5.0%
Mexico	16.0%
Netherlands	3.0%
United Kingdom	9.0%
Other (Rest of World)	20.0%
Total	100.0%

^{*} Only the nine countries identified in Table 4-4 are used in the Bid Model; although, the traffic volumes shown in Table 4-3 represent total international usage for all countries.
