

# Wireless Business Internet strengthens national grocery store chain communications and operations with fast, reliable service.

## Challenges

- Some stores do not have adequate internet service from local providers
- Need to reliability provide access to training videos for employees
- Requires consistent communications with chain HQ and distribution warehouses
- Priority to provide guest Wi-Fi to shopping guests

## Solution

- Verizon LTE Business Internet 50 mbps and Verizon 5G Business Internet C-band 200 mbps at 75 grocery store corporate-owned locations

## Benefits

- Fast deployment from Verizon
- Easy to provision, easy to scale
- Faster wireless speeds vs. local wireline options
- One provider consolidation

- Operates thousands of retail grocery stores in dozens of states nationwide
- Owns and Operates other national brand grocery store chains
- One of the largest grocery retailers in the US by number of stores and revenue
