# Notice on Decommissioning of Verizon Partner Solutions GWP API

March 24, 2022

Dear Customer,

We want to inform you that the Verizon Partner Solutions Global Wholesale Pricing (GWP) Application Programming Interface (API) will be shutting down new quote request transactions for all products. **On or after September 30, 2022, the GWP API will no longer be available.**

You're receiving this communication because our records show that you currently utilize the GWP API, which is accessed via the following URLs:

- <https://api.verizon.com/itwGwpQuote>
- [https://wsgateway.verizon.com/VRDOrderingService\\_v2.0r1?wsdl](https://wsgateway.verizon.com/VRDOrderingService_v2.0r1?wsdl)

**All customers and vendors using the GWP API will be required to transition to the Verizon Partner Solutions Exchange Quoting API.** This process will require modification to your API and may take several months to complete. Our team will guide you through this process in order to achieve a smooth transition.

These are the high-level steps that you will need to complete in migrating to the Verizon Partner Solutions Exchange Quoting API:

- Establish new credentials
- Upgrade security to 2 Way Secure Sockets Layer (SSL) for authentication
- Review API technical specifications outlining the conversion from XML to JSON
- Develop according to API specifications
- Perform joint testing with Verizon
- Point your process to the API URL
- Deploy changes in production

Please contact Verizon at [vz.vps.api.team@verizon.com](mailto:vz.vps.api.team@verizon.com) to obtain the technical specifications and begin planning your migration.
