

Manage the mobile devices across your organization.

Verizon Mobile Device Management (MDM) helps you manage, track and control employee and student mobile devices through a unified management portal.

Flyer

Cybercriminals can take advantage of remote working and learning environments to compromise critical data and cart away valuable information. Businesses and educational institutions need to protect data and ensure that remote employees and students can safely use the internet and mobile devices.

Verizon MDM simplifies managing devices used for today's remote work and learning.

Verizon MDM helps mitigate mobile risk across your organization by streamlining how you manage mobility and protect data. Through a single management portal, you can remotely manage, track and control mobile devices running on your network.

Remotely manage mobile devices with critical capabilities that:

- Locate, lock or wipe stolen devices
- Enforce passcode requirements to help prevent unauthorized access
- Restrict access to specific apps or device functions
- Detect devices that are out of compliance

Verizon MDM helps you take control of a variety of mobile environments and endpoints.

Get the features you need to manage and secure mobile devices.

Remotely manage smartphones, tablets, laptops, Jetpack® 4G LTE mobile hotspots, wearables, routers and more with these critical capabilities:

- **Broadband hotspot management**— Control access security profiles, policies and settings on select Jetpack mobile hotspot and USB devices
- **Unified endpoint management**— Configure, manage and protect mobile devices running Android® and Apple® iOS
- **Device diagnostics**— Access online, near real-time technical device data to troubleshoot devices and avoid downtime

Why you can rely on Verizon

Our commitment to advanced mobility solutions shines through our 4G LTE network—America's most reliable network. Verizon was ranked #1 nationwide by RootMetrics in overall network performance 14 times in a row, seven years in a row.¹ 4G LTE is available in 500+ markets and covers 98% of the U.S. population.
