1. GENERAL

1.1 **Service Definition.** BlueJeans by Verizon + is a cloud-based audio, video and web-conferencing solution offering three options - BlueJeans Meetings, BlueJeans Events and BlueJeans Rooms (collectively or separately referred to as BlueJeans Service).

1.1.1 **Platforms.** Except where explicitly stated otherwise, these terms apply to Optimized Service.

2. AVAILABLE VERSIONS OF BLUEJEANS

2.1 BlueJeans Meetings

2.1.1 **Service Definition.** BlueJeans Meetings allows Customer to instantly host, join, or manage a collaboration session where leaders and participants can share audio, video and data. BlueJeans Meetings is available using a web browser, a desktop application, or using BlueJeans Meetings applications on iOS and Android devices. Customer must choose a service option and license subscription option, as detailed below.

2.1.2 **BlueJeans Meetings Service Options.** Customer must select one of the following service options, per service instance – Standard, Pro or Enterprise.

	Standard	Pro	Enterprise
Participant Count (incl. leader)	50	75	150

Minimum License Purchase	1	1	25
Recording Storage	5 Hours	25 Hours	Unlimited

2.1.3 **BlueJeans Meetings License Options.** Customer cannot request a license option upgrade until month 12 of each Service Commitment period.

2.1.3.1 **Named Host License.** Each service option requires a Named Host license subscription which allows Customer to assign a specific number of Named Host licenses to its named Employees. Each named Employee assigned a Named Host license may host BlueJeans Meetings during the applicable Service Commitment, as specified in the Agreement.

2.1.3.2 **Active Host License.** The Active Host license subscription is only available with the Enterprise service option, and provides Customer with a license to use BlueJeans Meetings where Customer pays for the number of Host accounts that are used by Customer's Employees (i.e., that are "active") during the Service Commitment period. The number of Active Hosts in a monthly billing cycle is considered the monthly Active Host count. Customer commits to initially pay for 20% of the total Employee population for the first year of service with a minimum initial license purchase of 50. Customer usage is monitored in months 9, 10 and 11 of the first contract year. The number of Active Hosts in each month will be averaged to determine the number of licenses the Customer must pay for in the following year. The price per license will remain the same through the Service Commitment period. However, the commitment level may be assessed on a true forward basis in subsequent years based on the number of Active Hosts in the previous year. In year two, the true forward number will be capped at 40% of the original base population regardless of actual true forward usage. In years three, four and five, the true forward number is capped at 60%. If Customer's term expires and is not renewed but Service continues, Verizon may increase licenses up to 100% of the original base population.
